

M G S

Third-Party & Operating Costs

What it costs to run the platform

Indicative monthly and one-time costs for the third-party services the app depends on. *These are estimates, not fixed quotes.*

Infrastructure & hosting

	Cloud Server / VPS	MONTHLY · Application + database server	\$50–\$200 / mo
	Domain	ANNUAL · .com domain	\$10–\$30 / yr
	SSL Certificate	ANNUAL · Let's Encrypt or paid SSL	\$0–\$100 / yr
	Cloud Storage	MONTHLY · User photos & videos	\$10–\$100+ / mo
	CDN / Security	MONTHLY · CDN, DDoS protection, WAF	\$0–\$100 / mo
	Database Backup	MONTHLY · Automated backups	\$10–\$50 / mo
	Monitoring / Error Tracking	MONTHLY · Sentry and similar	\$0–\$100 / mo

Indicative figures, not fixed quotes — usage-based services vary with active users and volume.

Communications, maps, AI & analytics

	SMS / OTP	USAGE-BASED · Phone verification	\$20–\$300+ / mo
	Email Service	MONTHLY · Verification & notifications	\$0–\$50 / mo
	Push Notifications	MONTHLY · Firebase / FCM	\$0–\$50 / mo
	Maps / Geolocation API	USAGE-BASED · Location & distance matching	\$0–\$200+ / mo
	AI Services	USAGE-BASED · Verification, matching, recommendations	\$50–\$500+ / mo
	Voice / Video Calling	USAGE-BASED · WebRTC / Agora-type service	\$50–\$500+ / mo
	Analytics	MONTHLY · Product & user analytics	\$0–\$100 / mo

Indicative figures, not fixed quotes — usage-based services vary with active users and volume.

Distribution, payments & operations

	Apple Developer Account	ANNUAL · iOS App Store	\$99 / yr
	Google Play Console	ONE-TIME · Android publishing	\$25 one-time
	App Store / Play Store	COMMISSION · Subscription & app purchases	~15–30% of revenue
	Payment Gateway	PER TRANSACTION · Subscription payments	~2–4% per txn
	Customer Support Tools	MONTHLY · Support / ticket system	\$0–\$100 / mo
	Legal / Privacy / Compliance	ONE-TIME + ANNUAL · Policies, contracts, compliance	\$500–\$3,000+
	App Maintenance & Infra	MONTHLY · Updates, monitoring, fixes	\$200–\$1,000+ / mo

Indicative figures, not fixed quotes — usage-based services vary with active users and volume.

Rough overall budget

For a new dating app with a small-to-medium user base, MGS would guide the client to expect:

Initial setup / registration *one-time*

~ \$150 – \$500

MONTHLY — SCALES WITH THE USER BASE

Basic infrastructure MVP live, few users

~ \$100 – \$500 / mo

Moderate usage AI + SMS + calling active

~ \$500 – \$1,500 / mo

Growing app Scaling user base

~ \$1,500 – \$5,000+ / mo

Large-scale platform High traffic & volume

\$5,000 – \$20,000+ / mo

Monthly cost scales with active users, AI usage, SMS volume and call minutes — not with a fixed plan.

Keeping the quote predictable

Development is quoted separately

The MGS build quotation covers design and engineering only — it does not absorb running costs.

Third-party services billed at actuals

SMS, AI, storage, calling, payment processing and cloud infrastructure are paid directly by the client or billed at real usage.

No hidden markup on usage

This keeps the development quotation free of unpredictable, volume-driven costs that neither side can forecast precisely.

Figures are indicative

Every amount here is a planning estimate. Actual invoices depend on providers chosen and the app's real traffic.

MGS

Thank you
