

Sure. For the client proposal, you can add a **rough USD estimate in the 4th column.**

These are indicative figures, not fixed quotes.

Cost Item	Frequency	Approx. Basis	Rough Amount (USD)
Cloud Server / VPS	Monthly	Application + database server	\$50–\$200/mo
Domain	Annual	.com domain	\$10–\$30/yr
SSL Certificate	Annual	Let's Encrypt / paid SSL	\$0–\$100/yr
Cloud Storage	Monthly	User photos/videos	\$10–\$100+/mo
CDN / Security	Monthly	CDN, DDoS, WAF	\$0–\$100/mo
Apple Developer Account	Annual	iOS App Store	\$99/yr
Google Play Console	One-time	Android publishing	\$25 one-time
SMS / OTP	Usage-based	Phone verification	\$20–\$300+/mo
Email Service	Monthly	Verification, notifications	\$0–\$50/mo
Push Notifications	Monthly	Firebase/FCM	\$0–\$50/mo
Maps / Geolocation API	Usage-based	Location & distance matching	\$0–\$200+/mo
AI Services	Usage-based	Verification, matching, recommendations	\$50–\$500+/mo
Voice / Video Calling	Usage-based	WebRTC / Agora-type service	\$50–\$500+/mo
Payment Gateway	Transaction-based	Subscription payments	~2–4% per transaction
App Store / Play Store Commission	Revenue-based	Subscription/app purchases	~15–30% of applicable revenue
Monitoring / Error Tracking	Monthly	Sentry etc.	\$0–\$100/mo

Cost Item	Frequency	Approx. Basis	Rough Amount (USD)
Database Backup	Monthly	Automated backups	\$10–\$50/mo
Analytics	Monthly	Product/user analytics	\$0–\$100/mo
Customer Support Tools	Monthly	Support/ticket system	\$0–\$100/mo
Legal / Privacy / Compliance	One-time + annual	Policies, contracts, compliance	\$500–\$3,000+
App Maintenance & Infrastructure Management	Monthly	Updates, monitoring, fixes	\$200–\$1,000+/mo

Rough overall budget

For a **new dating app with a small-to-medium user base**, I would tell the client:

- **Initial setup/registration:** ~\$150–\$500
- **Basic monthly infrastructure:** ~\$100–\$500/month
- **With moderate users + AI + SMS + calling:** ~\$500–\$1,500/month
- **Growing app:** ~\$1,500–\$5,000+/month
- **Large-scale platform:** \$5,000–\$20,000+/month+

Important: App development cost should be quoted separately. Third-party services such as SMS, AI, storage, calling, payment processing and cloud infrastructure should ideally be **paid directly by the client or billed at actual usage**. This prevents your development quotation from absorbing unpredictable usage costs.
